

FACTSHEET B D **DK** F NL S**Enabler:****Disabler:** Only Danish fire tests and Danish thresholds are accepted in Denmark**Details (Maks 3 text lines):**

In Denmark all individual materials as well as all combinations of materials must be tested even if well proven in other countries.

Enabler (arguments): N/A**Disabler (arguments):**

By only accepting national tests Danish regulation makes it expensive and time consuming to introduce bio-based materials that this way may never reach the market or at great expenses and with mayor delay.

Suggested alternative:

Standardised test procedure for all EU

Make a European standard data base

Standardised threshold levels
